

Michigan Named the Salad Bowl. Washington Still Won't.

On July 13, Michigan became the first state to point a finger: its health department said **lettuce and salad greens** are the likely source of a *Cyclospora* outbreak that has now sickened **more than 4,000 people across at least 31 states**. Local officials in Ohio have said the same. Every other state, and the FDA, is still staring at a blank column — no advisory, no recall, no named food.

NAMED A SUSPECT Michigan — lettuce & salad greens State health dept., Jul 13. No grower, supplier or brand yet; other foods not ruled out.	ECHOED LOCALLY Ohio — Lorain County officials Local officials point to bagged lettuce; the state DOH line stays "no common source."	STILL SILENT ON A FOOD CDC & FDA Traceback on several clusters underway; no advisory and no recall as of Jul 14.

state named lettuce

Green outline = state health dept. named lettuce (Michigan). Dashed amber = local officials named it (Ohio). Numbers are state-reported / press-tallied and run ahead of the CDC's confirmed figure; Ohio's 361–397 range shows how counts differ by source and window.

These are **state-reported and press-tallied counts** — deliberately, since they run weeks ahead of the CDC's confirmed figure. They use different windows and case definitions state to state, so they don't sum cleanly. Michigan and New York include their largest metro clusters (Detroit; New York City). Data compiled July 14, 2026 and moving daily — Michigan added more than 1,000 cases in three days.

EVERY STATE, EVERY SOURCE

STATE	REPORTED CASES	SOURCE (CLICK TO OPEN)
Michigan 🥬 lettuce named	2,640 cases Jul 13, 2026 · 44 hospitalized	Michigan DHHS ↗ State avg ~50/yr; 55 counties + Detroit. State officials named lettuce/salad greens as the likely source (Jul 13).
New York	470 cases Jul 9, 2026	NY State DOH (via CBS New York) ↗ Statewide; NYC alone 372 (NYC DOHMH, Jul 10). Among CDC's traceback clusters — no source confirmed.
Ohio · lettuce (local)	361–397 cases Jul 13, 2026 · 46 hospitalized	Ohio DOH (via CNN & WOSU) ↗ ODH's official statewide count is 361 (since Jun 1); WOSU put it near 400. Lucas Co. (Toledo) alone 306. State line: no common source — but LOCAL officials (Lorain Co.) point to lettuce.
North Carolina	205 cases Jul 10, 2026	NC DHHS (via NBC News/TODAY) ↗ Since May 1.
Illinois	141 cases Jul 2026	Illinois DPH (via NBC News/TODAY) ↗ 'Higher than average'; among CDC's traceback clusters — no source confirmed.
Florida	100+ cases Jul 10, 2026	Florida DOH (via ABC News) ↗ Reported as more than 100 cases.
Indiana	72 cases Jul 2026	Indiana DOH (via NBC News/TODAY) ↗ Since May 1.
Texas	48 cases May 1–Jul 6, 2026 · 5 hospitalized	Texas DSHS (via NBC News/TODAY) ↗ Among CDC's traceback clusters — no source confirmed.
California	1–10 cases Jul 10, 2026	CDC / ABC News tally ↗ CDC's lowest case bin.
